STUDENT USER GUIDE

JTMK | DFT50114 Integrated Project

A route-accurate guide to the Student portal: account access, the active project-registration form, document submission, marks, milestones, deadlines, group search, archives, and profile management.

1. Sign in and navigate the portal

- Open the SPInE home page and select Login. Enter the IC number and password assigned to your student account. Imported accounts initially use the IC number as the password; change it after signing in.
- The Student side menu contains Dashboard, My Project, Upload Documents, Evaluation Marks, Deadline Reminders, Group List, and Past Projects Archive. The top bar contains language, appearance, Home, and Profile controls.
- Use Logout when finished, particularly on a shared computer. If login fails, verify the IC number and password and contact Admin rather than creating a second account.

2. Dashboard: understand each status

- Dashboard provides Project Status, Total Score, Project Rank, Document Submission Status, and project summary. Not Registered means no current project is linked to the account. In Progress means the project is not marked complete. Complete & Ready means the project record is marked ready for evaluation.
- Total Score and Project Rank appear only when mark data is available. Not Evaluated Yet or a dash means there is no applicable result yet; it does not indicate that the project registration failed.
- Document cards show Uploaded or Not Uploaded for the listed rubric components. Use Upload File to open the upload page. Check the project title, session, and supervisor in Project Summary Information.

STUDENT | Actual System Screenshot

The screenshot displays the SPInE Student Dashboard for Politeknik Besut. The interface includes a sidebar with navigation options: Dashboard, My Project, Upload Documents, Evaluation Marks, Deadline Reminders, Group List, and Past Projects Archive. The main content area features a 'Welcome, Student' message and a summary of project progress and document submissions. Key metrics shown include Project Status (In Progress), Total Score (Not Evaluated Yet), and Project Rank. A 'Document Submission Status' section lists various submission items with their respective upload statuses.

Document Submission Status	Upload Status
A: Proposal Presentation (10%)	Uploaded
B: Project Demonstration 1 (10%)	Uploaded
C: Project Demonstration 2 (10%)	Not Uploaded
D: Project Demonstration 3 (15%)	Not Uploaded
E: Final Presentation - Poster (15%)	Not Uploaded
F: Final Presentation (15%)	Not Uploaded
Technical Report (15%)	Not Uploaded

Student Dashboard. Account name is masked.

- Review all members, title, category, and description. Submit Project Registration once. A successful registration is saved as a project plus member records and redirects to My Project. If an error appears, correct the highlighted information and resubmit.

4. My Profile: update account details

- Open Profile from the top bar. Full Name and Department are read-only. IC Number, Matric Number, and Email can be edited when valid and unique.
- Matric numbers accept letters and numbers only. If an IC or matric value is already used by another account, the system rejects the update.
- To change the password, enter at least eight characters. Leave it blank to keep the current password. A profile image accepts JPG, PNG, or WEBP up to 2 MB. Select Save Profile and read the success/error message.

5. Upload Documents: categories, rules, and status

- Open Upload Documents. Select a Document Type, choose the file, then select Upload Now. Supported file extensions are PDF, DOCX, and ZIP; the system validates extension, MIME type, and upload size.
- The rubric categories are A Proposal Presentation (10%), B Project Demonstration 1 (10%), C Project Demonstration 2 (10%), D Project Demonstration 3 (15%), E Final Presentation - Poster (15%), F Final Presentation (15%), and Technical Report (15%). Use the exact category shown in the dropdown.
- A document type can be submitted once for the group. If another member submitted it, the category is disabled and labelled as submitted by a group member. Ask the member who uploaded it for the original copy if needed.
- Submitted Documents List shows category, file name, Pending/Approved/Rejected status, upload date, and Download. Pending means awaiting review; Approved means accepted; Rejected means follow up with the supervisor. Download opens the stored file.
- If upload fails, check the alert, permitted format, file size, selected category, and whether the group already submitted that type. Do not repeat the upload unless the system confirms the previous attempt failed.

STUDENT | Actual System Screenshot

The screenshot displays the SPInE (Student Project Information System) interface for Politeknik Besut. The top navigation bar includes the system logo, language toggles (EN/BM), a home button, and a user welcome message. A left sidebar contains navigation links for Dashboard, My Project, Upload Documents (highlighted), Evaluation Marks, Deadline Reminders, Group List, Past Projects Archive, and Logout. The main content area is titled 'Upload Project Documents' and includes instructions to submit DFT50114 rubric components as PDF, DOCX, or ZIP files (max 20 MB). Below this is an 'Upload Form' with a 'Document Type' dropdown menu (currently showing '-- Select Rubric Category'), a 'Choose File' section with a file selection button and a placeholder 'No file...hosen', and an 'Upload Now' button. The footer contains copyright information for 2026.

STUDENT | Actual System Screenshot

Evaluation Marks showing Demo 1 and Demo 2 status.

- Archive projects are references, not the logged-in student's current project. Use My Project to check current membership.

9. Student troubleshooting checklist

- My Project redirects: the account already belongs to a project; the registration form is intentionally unavailable to existing members.
- Member lookup fails: verify the matric number and confirm that the person is a registered JTMK student and is not already selected.
- Document option disabled: another member already submitted that rubric category for the group.
- Marks are blank: check the registration and wait for the supervisor/panel workflow that owns the result. Contact the supervisor or Admin if the saved group or status is incorrect.

DETAILED WORKFLOW NOTES | JTMK | DFT50114

Before you register

- Use My Project only when your account is not already linked to a project. If the page redirects to the existing project summary, registration is already complete for that account.
- The active registration form creates a new group with the signed-in student as Leader. It does not provide a Join Existing Project action. Do not use older instructions that describe joining through this screen.
- Prepare a unique project title, choose the closest JTMK IT category, confirm the academic session, and prepare a description of no more than 500 characters before submitting.

Add optional members

- Student #1 is fixed to the logged-in account. Student #2 and #3 are optional; leave unused member fields empty.
- Enter a registered JTMK matric number and leave the field. Wait for the lookup result before continuing. On success, check the returned name, IC, track, class, phone, and email.
- If lookup fails, verify the matric number and ask Admin whether the account exists. A student cannot be added twice or belong to two project groups.

Submit and verify

- Complete all required project fields, tick the originality declaration, and submit once. The system validates the session token, title, category, session, description, and group members.
- A successful save creates the project and member-role records together and returns to My Project. Verify the title, category, leader/member roles, and all intended members.
- If submission fails, read the alert and correct the indicated field. Do not retry repeatedly when the success redirect has already happened.

DETAILED WORKFLOW NOTES | JTMK | DFT50114

Upload decision checklist

- Choose the exact rubric category first, then select a PDF, DOCX, or ZIP file within the displayed limit. The server checks both file extension and MIME type.

- Each rubric category is submitted once for the group. A disabled category means another member already submitted it; coordinate with that member instead of trying another category.
- After upload, check for the success alert and a row in Submitted Documents List. Pending awaits review, Approved is accepted, and Rejected needs follow-up. Download retrieves the stored file and does not replace it.
- Rubric components are Proposal 10%, Demo 1 10%, Demo 2 10%, Demo 3 15%, Poster 15%, Final Presentation 15%, and Technical Report 15%. Uploading a file alone does not award marks.

Statuses, deadlines, and searches

- Evaluation Marks currently shows Demo 1 and Demo 2 verification only. Pending means no result saved; Passed/Not Passed are milestone outcomes, not numerical grades. The former logbook card is removed.
- Dashboard Total Score/Rank appears when marks are recorded. Demo 3 marks come from the panel QR flow, separately from the student document upload.
- Deadline Reminders: Active is open, Expired is past due, Waiting for Admin has no announced date. Check exact date and time; reminders do not automatically change marks.
- Group List searches the system by project title, student name, or matric. Reset clears filters. Past Projects Archive filters by keyword/session and opens View Details; archive entries are references, not the current project.

SUPERVISOR USER GUIDE

JTMK | DFT50114 Integrated Project

A route-accurate guide to the Supervisor portal: dashboard, assigned projects, read-only document review, Demo 1/Demo 2 status, deadlines, past projects, and profile.

1. Sign in and navigate the portal

- Sign in with an account assigned the Supervisor role. Confirm the displayed account name before reviewing or updating student records.
- The Supervisor side menu contains Dashboard, Supervised Projects, Student Verification, Past Projects, Review Documents, and Deadline Reminders. The top bar provides Home, Profile, language, and appearance controls.
- Use Logout when finished, especially on a shared computer.

2. Dashboard and Supervised Projects

- Dashboard shows the number of assigned students and supervised groups, plus a Recent Student Submissions & Groups summary. The summary is limited; use View All or Supervised Projects for the full list.
- Supervised Projects lists project title, leader, group members/matric numbers, category, session, and department. Search accepts a project title, student name, or matric number.
- Select Search Project to filter. Clear the query and submit again for the full list. If a project is missing, verify the student/group identity and ask Admin to check the supervisor assignment.

Supervisor Dashboard. Account name is masked.

- Review files against the correct project and category. If the file is unreadable or the category is wrong, follow up with the project group through the usual communication channel.

4. Student Verification: Demo 1 and Demo 2

- Open Student Verification. Check the student name, matric number, session, and current Demo 1/Demo 2 statuses.
- Select Milestones on the correct student row. The status form is limited to a student assigned to the signed-in supervisor.
- Choose Passed or Not Passed for each Demo being updated. Leave a field blank to keep that milestone unchanged. The form rejects a submission when both fields are blank or an invalid status is selected.
- Select Save Status and wait for the success message. Return to Student Verification and confirm the new status. These values are milestone statuses, not numerical marks.

© 2026 **SPInE FYP** | Politeknik Besut, Terengganu. Hak Cipta Terpelihara.

Assigned-student list. Names and matric numbers are masked.

- Deadline Reminders displays published document schedules. Check the due date and exact time; a reminder does not automatically update a milestone status.
- If a student is absent from the list or a deadline is unclear, verify the student assignment and ask Admin to check the relevant record.

7. Supervisor Profile

- Open Profile from the top bar. Full Name and Department are read-only. IC/Staff ID and Email can be updated if valid and not duplicated.
- A new password must contain at least eight characters; leave it blank to keep the current password. Profile pictures accept JPG, PNG, or WEBP up to 2 MB.
- Select Save Profile and check the result message. If an identifier is already in use, resolve the duplicate before retrying.

8. Supervisor troubleshooting

- Student not listed: confirm the matric number, current session, and supervisor assignment; ask Admin to correct the assignment if needed.
- Status did not change: confirm the correct student and Demo, select a valid value, save, and check the success/error alert.
- Document will not open: return to Review Documents, verify the listed file, and report a broken link to Admin.
- An old route redirects: use the active Student Verification and Review Documents routes described above.

DETAILED WORKFLOW NOTES | JTMK | DFT50114

Find the correct assigned project

- Dashboard counts and Recent Student Submissions & Groups are summaries. Open Supervised Projects for the full assigned list.
- Search by title, student name, or matric. Confirm the session, leader, group members, category, and department before reviewing.
- If a project is missing, do not borrow another supervisor account. Ask Admin to verify the project leader/member and supervisor assignment.

Review files without changing their status

- Open Review Documents, select a supervised project, and check category, original filename, Pending/Approved/Rejected status, and upload date.
- Select View to open the stored file in a new tab. Return to Projects to inspect another group. No documents submitted means the project has no available upload rows.
- This screen is read-only: viewing a file does not approve/reject it, save marks, or update Demo status. Report a broken file link to Admin.

Understand the available marking routes

- Student Verification controls Demo 1 and Demo 2 statuses. Demo 3 numerical marks are entered by an external panel through QR.

- The legacy Project Marks/Evaluate Project route may redirect to Student Verification; it is not an active numerical supervisor-marking route.
- The old Verify Logbook route redirects to Student Verification. No weekly logbook approval screen is available in the current Supervisor workflow.

DETAILED WORKFLOW NOTES | JTMK | DFT50114

Save a milestone status

- In Student Verification, confirm student name, matric number, and session, then select Milestones on that student row.
- Choose Passed or Not Passed for Demo 1 and/or Demo 2. A blank field means keep that status unchanged. At least one valid status must be selected before Save Status succeeds.
- Wait for the success/error message, return to the list, and confirm the updated value. These statuses are verification only, never numerical grades.

Profile and other menu pages

- Profile permits a unique IC/Staff ID and valid email update. Full Name and Department are read-only. New passwords require eight characters; leave blank to retain the current password.
- Profile pictures must be JPG/PNG/WEBP and at most 2 MB. Save and check the result alert.
- Past Projects and Deadline Reminders are reference pages. A deadline does not automatically mark a Demo as Passed.

When something goes wrong

- Student missing: confirm matric/session and ask Admin to check the supervisor link. Status unchanged: verify the student row and selected Demo, save, then check the alert.
- Document missing: confirm the correct project and category. Legacy page redirects are expected for unavailable workflows; report them rather than recording a substitute status.

EXTERNAL PANEL USER GUIDE

JTMK | DFT50114 Integrated Project

A full QR-batch workflow for panel registration, group selection, Panel's Choice, the eight-criteria rubric, saving marks, and resolving submission errors.

1. Open the QR and register as a panel member

- Open the QR/link supplied by Admin. Confirm the page is Panel Evaluation for DFT50114. A QR session contains only its assigned project groups and expires on the displayed expiry date (normally seven days after creation).
- On Panel Member Registration, enter Panel Name. Email Address is optional unless the form marks it required. Select Continue to Groups.
- A split batch may have a maximum panel-member allocation; a shared QR can be used by all panel members. If the QR is full, expired, or has no groups, contact Admin for the correct link.
- Use the same name and email across QR sessions. The system normalizes the identity and blocks a duplicate evaluation of the same project across different QR batches.

EXTERNAL PANEL | Actual System Screenshot

Panel Evaluation
Project Demonstration 3 | DFT50114

Panel Member Registration
This QR batch contains 18 groups and is shared by all panel members. Register your own details so your scores stay separate.

Panel Name *

Email Address

Continue to Groups

Live Panel Member Registration. No details or scores were submitted.

- Construction and functionality: how the system was built and how it operates.
- Feasibility: practicality of construction and implementation.
- Originality: whether the idea is genuine and not copied.
- Marketability: evidence such as surveys, clients, laboratory tests, MyIPO, or testimonials.
- Creativity: originality and inventiveness of the ideas.
- System Security, Features and Testing: user controls, validation, system features, and evidence of testing.
- Each criterion contributes 12.5 points to each student's total out of 100. Demo 3 out of 15 is calculated as $\text{total}/100 \times 15$. The system stores individual marks and computes the group ranking inputs.

5. Save and finish the QR batch

- Before submission, confirm all eight criteria are filled for every student and the displayed group is correct.
- Enter optional Comments / Feedback, then select Done - Save Scores once. Wait for Scores saved or read any validation error.
- Return to Group List and check that the group shows Complete. Continue with each remaining group in the QR.
- When all assigned groups are complete, the system shows Evaluation Complete or a Done button. Select Done if displayed.

6. Panel troubleshooting

- Missing score error: revisit each of the eight criteria and ensure a value is selected for every student.
- Already assessed message: a matching name/email already evaluated the project. Do not change the name/email to bypass the duplicate safeguard; contact Admin if the saved identity is incorrect.
- No QR groups or expired link: request a current QR from Admin. QR links should only be shared with their assigned panel members.
- Scores saved but no ranking row: ranking appears after the evaluation is stored and the selected QR batch is processed. Return to Group List and verify Complete.

SELECTION

DETAILED WORKFLOW NOTES | JTMK | DFT50114

Register for a QR session

- Open the Admin-provided QR/link and confirm Panel Evaluation and DFT50114. Each QR maps to specific projects and normally expires after seven days.
- Panel Name is required; Email Address is optional unless the form says otherwise. Continue to Groups opens the group list. Split QR sessions can have a seat limit; shared sessions are open to assigned panel members.

- Use the same name/email consistently. The system blocks the same normalized identity from scoring the same project again through a different QR.

Select a project and favourite

- Group List contains only projects mapped to that QR. Check title and members, then choose Assess Group.
- Complete means an evaluation by this panel identity already exists. Do not attempt a duplicate assessment.
- The star toggles Panel's Choice for the current QR session only. Star selection is separate from scoring: neither action automatically performs the other.

RECOVERY

DETAILED WORKFLOW NOTES | JTMK | DFT50114

Score all students consistently

- Before scoring, confirm project title, supervisor, student names, and matric numbers. Each of eight criteria needs a score 1–4 for every student.
- Criteria: project achievement/objective; user requirements; construction/functionality; feasibility; originality; marketability; creativity; system security/features/testing.
- Use the on-screen level descriptions: 4 Very Good, 3 Good, 2 Fair, 1 Weak. Each criterion is 12.5 points of total /100; Demo 3 /15 is calculated as total/100 x 15.
- Navigate with Criteria tabs, Previous, and Next Criteria. The progress indicator shows incomplete areas. Comments are optional and cannot replace missing scores.

Save and complete the batch

- Check all 8 criteria for every student and confirm the selected group. Choose Done - Save Scores once and wait for Scores saved.
- Return to Group List and confirm Complete before moving to the next project. At batch end, use Done/Evaluation Complete if shown.
- Missing score: return to incomplete criteria. Already assessed: the normalized identity has scored this project; contact Admin if identity records need checking. Expired/full QR or missing groups: request the correct current link.
- If the browser closes after submission, reopen the QR and check Complete first. A QR being generated does not mean marks exist; ranking appears after evaluations are saved.

ADMIN USER GUIDE

JTMK | DFT50114 Integrated Project

A detailed operating guide for the Admin Panel: dashboards, JTMK user records, student imports, supervisor assignments, approvals, QR setup, ranking/report interpretation, settings, and profile safety.

1. Access and navigate the Admin Panel

- Sign in with an account assigned the Admin role. The Admin Panel is restricted to authorized administrators.
- The sidebar opens Dashboard, Manage Users, Manage Projects, External Panel QR, Reports, and Settings. Logout is at the bottom. The sidebar toggle collapses it on desktop and opens it on smaller screens.
- The top bar provides language and appearance controls, Home, signed-in account, and Profile. Confirm you are operating within JTMK | DFT50114 before making updates.

2. Dashboard overview

- Dashboard shows counts for JTMK students, supervisors/lecturers, and registered projects. Overall Project Status separates Draft, Submitted, and Approved.
- Top 5 Project Ranking displays overall panel-mark results when data exists. Select View Full Ranking to open the batch-based report.
- Panel's Choices shows the current global count and links to its report. These dashboard values are summaries; use the dedicated Admin pages for changes.

DETAILED WORKFLOW NOTES | JTMK | DFT50114

Prepare and validate an import

- Manage Users accepts CSV/XLSX up to 5 MB with Name, IC No, Matric No, Session, Department headers. Only Department=JTMK imports; other departments are ignored.
- Rows are skipped for missing name/IC/matric/session, invalid non-alphanumeric matric, duplicate IC/matric inside the file, or an existing IC/matric/generated email. Read the summary and skipped-row list.
- Imported username and initial password are the IC number. Tell students to change it at first login; store and transfer the source file securely.
- Find Student requires at least two characters and returns at most 20 matches. Edit Student permits IC/matric/email/session and optional password reset; full name is read-only.

Deletion and supervisor directory

- Delete asks for confirmation and is blocked if the student has a project, group membership, or supervisor assignment. Resolve relationships through the appropriate workflow; do not bypass database dependencies.
- Lecturers/Supervisors is a directory display on Manage Users. This page does not create supervisor accounts.
- After edits/imports, verify the displayed account/session and check the success/error result before moving to another record.

ASSIGNMENT

DETAILED WORKFLOW NOTES | JTMK | DFT50114

Assign a supervisor to a whole group

- Manage Projects cards show project title/category/session, status, members, current supervisor, and individual Demo 1/Demo 2 states.
- Select a JTMK Supervisor and press Assign SV. The change applies to the project and its members. Confirm the correct group and supervisor, then verify Current Supervisor after success.
- If assignment fails, confirm the project is JTMK DFT50114 and the selected account has Supervisor role and JTMK department.

Approve a submitted project

- Approve appears only for Submitted projects. Check the group, title, and session, then select Approve and confirm the prompt.
- The status moves from Submitted to Approved. Draft projects cannot be approved here. A stale status or invalid form token is rejected; reload and check current state.
- The milestone table is Demo 1/Demo 2 verification. It is not the external panel Demo 3 scoring form.

DETAILED WORKFLOW NOTES | JTMK | DFT50114

Shared and split QR rules

- External Panel QR loads numbered groups from the latest project session. Confirm the group list/session before generation.
- Shared mode creates one QR for all groups. Split mode requires total panel members, QR batch count, groups per batch, and panel members per batch.
- Every split batch needs at least one group and two panel members. Group counts must equal all current groups; assignments must cover all panel members. A panel may be assigned to multiple batches.
- Review the live included-group preview and totals before Generate Split QRs. Each generated link/token is normally valid for seven days. Share only with assigned panel members.

Read Reports correctly

- Project Ranking by QR Batch lists sessions with evaluation marks, newest evaluation first. Select a date/time and Show Ranking to filter the results.
- No submitted scores means no ranked groups. QR generation alone creates no marks. Panel's Choices are stars saved to a QR session, separate from marks.
- External Panel Demo 3 Evaluations shows projects for the latest generated QR and available submissions. Panel breakdown reveals assessor, criteria, student marks, and feedback.
